

Certificate for the Proficiency Test Olfactometry 2020

This certificate was issued to confirm the participation of the laboratory:

Silsoe Odours Ltd
MK45 4HP Silsoe
UK

with the coding number: 117

in the international proficiency test for olfactometry, held in September 2020. The aim of the test was to determine the precision r and accuracy A_{od} according to EN 13725:2003. Results of the participant are as follows:

Quality Parameter assessed using 1-Butanol in Nitrogen	Results (requirements according to EN 13725)
$A_{od} = 0,144$	complies with requirement: $A \leq 0,217$
$r = 0,200$	complies with requirement: $r \leq 0,477$

The odorant provided was: 1-butanol in nitrogen.

The participant nominated an independent observer (Andrew Lane from Solsoe Spray Applications Unit), that attended the first-time opening of the package and was present when samples were transferred into sample bags directly before the measurement. The observer was shown the resulting raw data and checked its transfer to the provided results list.

Number of participating laboratories: 36
